Sir:

### **INFORMATION DISCLOSURE STATEMENT**

In accordance with the duty of candor and good faith imposed by 37 C.F.R. §1.56 and means of complying therewith according to 37 C.F.R. §§1.97 and 1.98, the references listed on the attached Form PTO-1449 are called to the attention of the United States Patent and Trademark Office in connection with the above-identified patent application. Copies of the cited reference is enclosed herewith.

No admission is made that the cited reference is prior art and/or material to patentability. The Examiner is urged to consider each of these references with respect to the subject matter claimed in the present application.

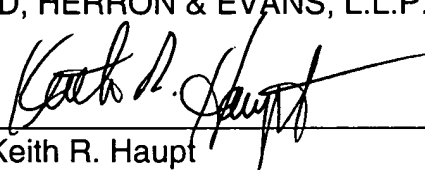

JP 2003351288 is in Japanese. An English language translation of the Abstract from this reference is as follows:

To inspect incorrect collating surely and efficiently at low cost. The device for inspecting incorrect collating of calendar uses a calendar feed device 10, in which a set of printed calendar sheets 41 (41-1, . . . ), the number thereof being specified, are gathered and stacked flat beforehand and supplied to a calendar binding machine 30 of a succeeding process. On the top side of a cover of the set of calendar 41 (41-1, . . . ), there are provided an incorrect collating sensing sensor 21 such as pattern matching sensor for recognizing a separation zone printed in a stripe shape as a pattern, and an incorrect collating judging unit 22, which judges an incorrect collating when the sensor 21 has not sensed a separation zone. The unit 22 judges the sheets stacked flat and in stationary state before the set of sheets are sent to the machine 30, and if it is judged that there is incorrect collating, the device 10 or a top metal mounting machine are stopped.

Respectfully submitted,

WOOD, HERRON & EVANS, L.L.P.
